PROJECTS

Shoe Catalouge using API's   **2023**

URL: https://shoe-catalogue-kapm.onrender.com
Github:
https://github.com/Thandeka93/-shoe_catalogue

The Shoe Inventory Management API, crafted for Lubabalo's shoe shop, optimizes his online catalogue by providing real-time access to inventory data, allowing seamless querying and updating of stock levels. Developed as a solo project using JavaScript, Node.js, SQL, and ElephantSQL, this API ensures a scalable and efficient solution, empowering Lubabalo to expand his business through streamlined integration.

Waiter Availability Webapp   **2023**
URL: https://waiters-webapp-jcvi.onrender.com
Github: https://github.com/Thandeka93/waiter_webapp

The Waiter Scheduling Web Application is designed to assist your sister in efficiently managing weekly waiter shifts for her coffee shop. Waiters can easily select and update their available days, while your sister can visualize the waiter availability, track the number of available waiters per day, and reset data for a new week. The application aims to streamline scheduling and ensure optimal coverage by highlighting days with sufficient, insufficient, or excessive waiter availability. App leverages ExpressJS for server-side functionality. The data is stored and managed using PostgreSQL, providing a robust and relational database solution.

EDUCATION

codex - 2023
Web Developer NQF5 Certificate: HTML, CSS, JavaScript, SQL

Entonjeni High School - 2011
